Professional Summary

Computer Science graduate with a strong foundation in Python, Java, SQL, and full-stack web development. Familiar with REST APIs, database management, and AI/ML concepts, with hands-on experience gained through internships and projects involving web applications, intelligent automation, and supply chain management systems. Eager to apply technical knowledge, strengthen problem-solving skills, and contribute to building reliable software solutions.

Technical Skills

Programming Languages: Python, SQL, HTML, CSS, JavaScript, Java
AI/ML and Data Science: Pandas, NumPy, Matplotlib, TensorFlow
Developer Tools : Git, GitHub, Visual Studio Code, Eclipse, Figma, WordPress

Internship Experience

Trigint Solutions *Mar 2026 – Aug 2026*
Junior AI Developer

- Contributed to the development and improvement of an AI-enabled Supply Chain Management (SCM) application
- Worked with Python, SQL, APIs, and data processing to support application workflows and business data presentation
- Supported dashboard features for supply chain operations and financial data visibility
- Collaborated with the team on feature implementation, debugging, and testing

Brain O Vision *Jul 2024 – Oct 2024*
Java Full Stack Developer Intern *Remote*

- Developed a College Management System using Java, Spring Boot, JDBC, and MySQL
- Designed 8 normalized database tables with 20+ stored procedures and triggers to maintain data integrity
- Implemented role-based access control (RBAC) for Admin, Faculty, and Student users and tested the application with user feedback

Key Projects

Community Festival Management Portal | **Live Demo** *React, TypeScript, Tailwind CSS, Node.js, Express.js, Supabase, PostgreSQL, Google Gemini 2.5 Flash*

- Developed a bilingual web portal to streamline community donations, festival scheduling, and administrative workflows
- Implemented donation submissions, admin verification, digital receipt interfaces, and transparent financial dashboards
- Integrated Supabase for cloud data storage and Google Gemini-powered OCR assistance for payment screenshot processing
- Deployed the application on Render for public access

Classroom Companion AI | **GitHub** *Python, Telegram Bot API, Flask, SQLAlchemy, SQLite, LLM APIs, React, JavaScript*

- Built an AI-powered college assistant and classroom management platform with a Telegram bot for academic help, assignment support, and career guidance
- Implemented teacher and student workflows for assignment creation, classroom joining, progress updates, and submissions
- Added AI-assisted assignment parsing, feedback generation, progress summaries, and deadline reminders using LLM APIs
- Developed Flask-based dashboards with database-backed classroom management using SQLAlchemy and SQLite

Education

N.S. Raju Institute of Technology *2021 – 2025*
Bachelor of Technology in Computer Science and Engineering *Visakhapatnam, Andhra Pradesh*

- CGPA: 8.18 / 10.0

Achievements & Certifications

- **Hackathons:** INNOEXPO-360 (JNTUGV) | Hardware Hackathon (NSRIT 2024) | 2nd Place IDEATHON (NSRIT)
- **Certifications:** Java Programming (Data Flair) | Web Development: HTML, CSS, JavaScript (Data Flair) | JavaScript, Node.js, Express.js (GDSC KIIT & DevTown)
